Fund Objective

Blockchain Strategies Fund is a specialist blockchain & cryptocurrency focused Fund of Funds. The fund provides investors with diverse exposure to multiple, carefully selected & weighted: strategies, managers & digital assets.

By diversification & active management the fund aims to outperform the Eurekahedge Cryptocurrency HFI with much lower volatility.

Portfolio commentary

After a positive January performance Blockchain Strategies Fund's USD and EUR share classes retreated slightly in February falling by 1% and 0.5% respectively, outperforming Bitcoin and most major crypto assets during the month.

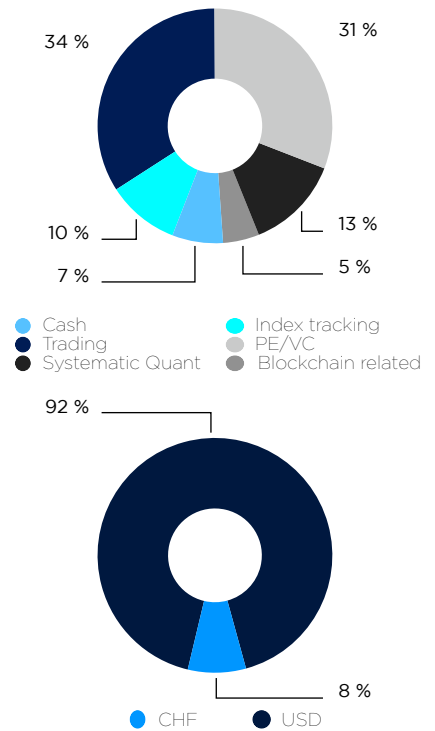

As always, the funds diversification provided a cushion and helped balance a negative contribution from the major cryptocurrencies and ICO/token investments, which are high beta investments, typically more impacted during periods of increased volatility.

Despite reduced exposure to PE like crypto assets, we remain well invested in this area as we expect their valuation to increase significantly at some point and do not see any reason to change our mind on sound, long-term investments. Coronavirus will not last forever! In the meantime, our positioning on multi-strategies alpha generating funds will continue to help the Fund smooth volatility spikes that are to be expected in a context of higher uncertainty.

As always, our focus is on diversification and participation to crypto assets and managers offering the greatest growth potential with the aim of reduced month-to-month volatility compared to direct investing in major crypto's such as Bitcoin, for example.

Since inception, the good news is that the Fund has consistently outperformed the Eurekahedge Crypto Currency Hedge Fund Index (by 13.2% as of February 2020). And the outperformance was achieved with roughly half the volatility of the index (34% volatility for the fund vs 59% volatility for the index).
